

NOTIFY COMMUNICATIONS

Why use a dozen apps when ONE gets the job done better?

With various visitation restrictions in place for senior living communities, caregivers and residents have been frustrated by the many different communication systems out there when attempting to connect people with each other.

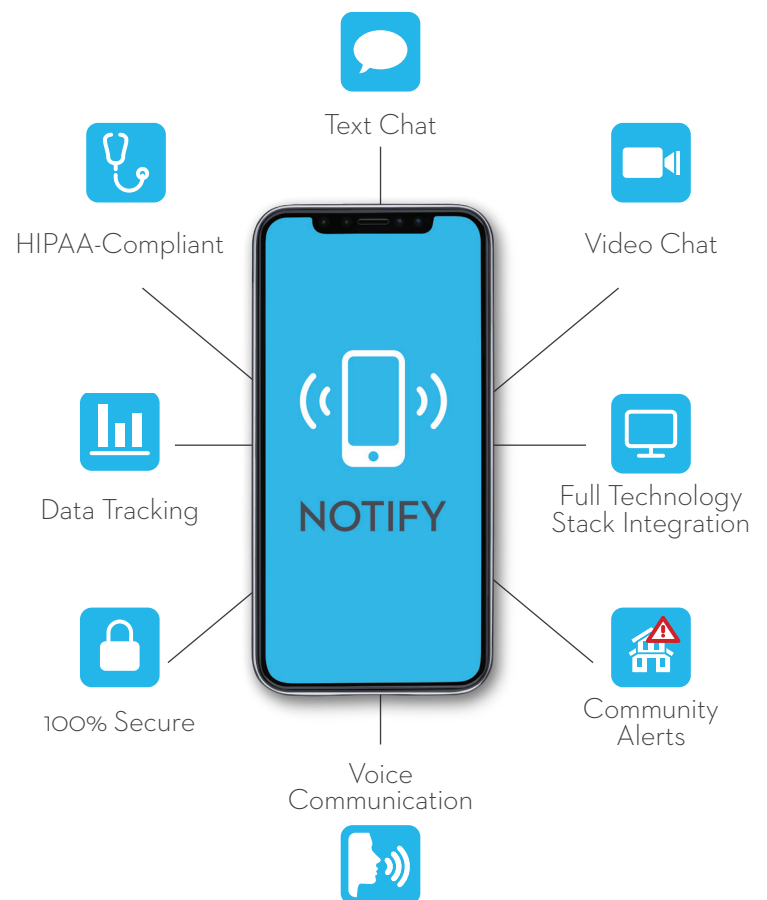

Managing it all can be a full-time job - and a confusing and inefficient one at that.

Luckily, it doesn't have to be that way.

NOTIFY Communications, our new video, voice and text communications app does so many things...

- Enables 24/7 resident and family engagement
- Supports staff health and efficiency
- Enables community wide alerts
- Securely connects care teams
- Provides informative reporting

... but it also reduces your technology management to just one platform, offering easy connectivity and peace of mind.

Learn more about how NOTIFY is the best tool for your organization's communication needs.

Visit us online at www.notifync.com, call 844-666-3039 or email sales@notifync.com.

Simple, self-contained, scalable.

And there's more:

NOTIFY Communications can do mass communications to your workforce, your residents and their families, and others connected to your community.

It's secure and HIPAA-compliant.

It's significantly more efficient and effective than email.

Best of all, it comes with NOTIFY's industry-leading customer service.

No more disparate communication systems that aren't connected to each other.

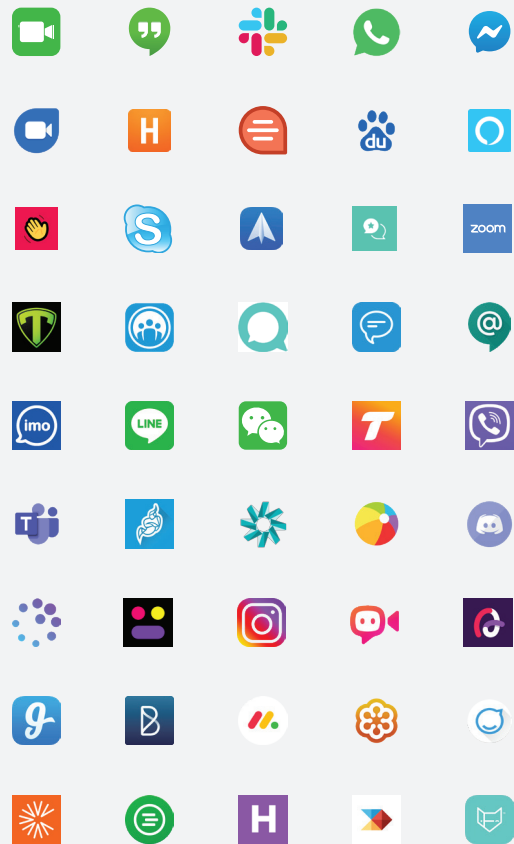

No more technology "solutions" that seemingly require a PhD to operate.

No more using one app for one thing and another for, well another.

Why not find something that can do it all .. one app that works on both Android and iOS, one integrated system, one source of truth across the whole platform. And, you are in control.

Stop wrestling with other technologies and get your community, your workforce, and your resident customers connected with NOTIFY Communications and start working with a technology that, well, just works.

None of these guys

can do everything
Notify can.

Save time, save money and improve resident outcomes
with NOTIFY Communications.
